- Figma
- Adobe XD

### Skills

#### User Research

- User Interview
- User Persona
- User Journey Map

#### Designing

- Interactive Design
- User Interface
- Design System
- Prototyping
- Wireframing

### Self-introduction

I'm Junior at UI/UX Designer, but i already have passion on it. I like to design Mobile Apps and Website. Interested on precision layouting, grids, and perfect combination visual color. I'm usually brainstorming about design inspirations in Social Media, Youtube, and Behance. I applied simple, elegant, and fresh interface in my design style. I hope we can work and improving our skills together as a team.
